

OPERATION RESURGENCE

APRIL 2023

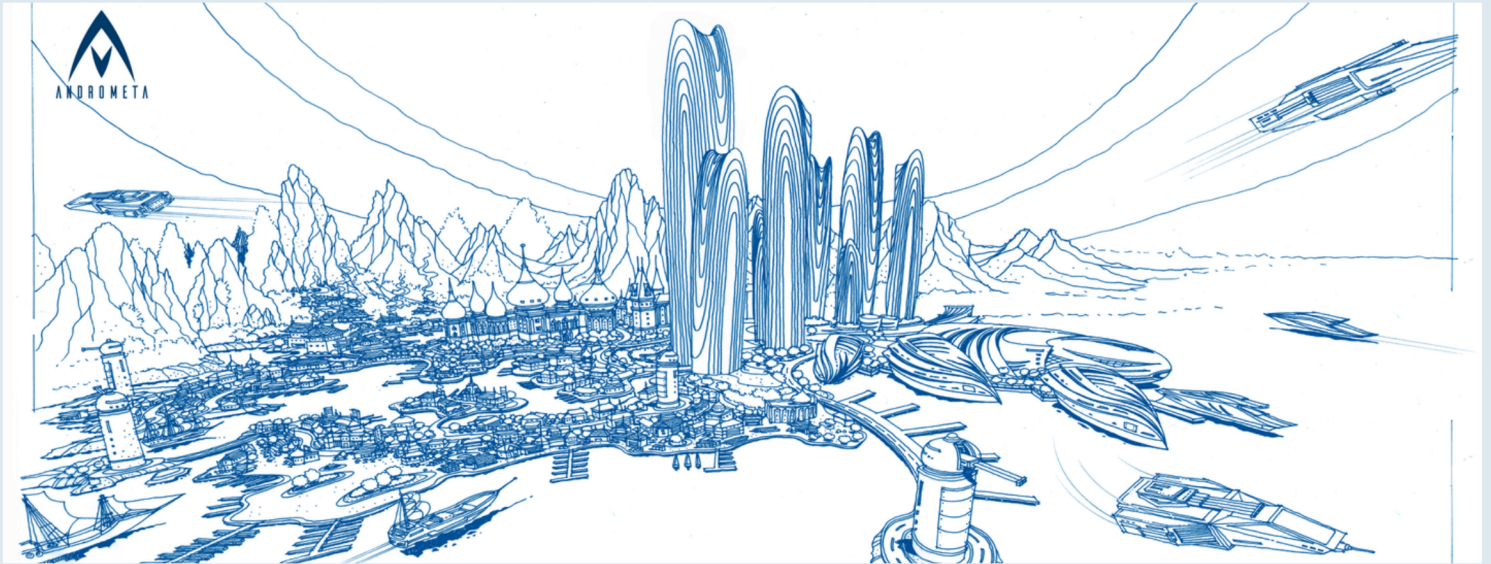

MISSION BREIF: LEVEL UP

In a world where markets are down, banks are collapsing, projects are imploding left and right, **WE REMAIN!** Strap in as we unveil thrilling news about a ton of product releases from two of the most *electrifying* NFT communities in the Web3 space: We Are the Outkast and The Sevens. After two tightly packed stealth years of development, we've brought together two OG communities in the NFT space, driven by a passion for innovation and a collective vision for the future of Web3.

Our dedicated teams have worked tirelessly the past 20 months+, pouring their creativity, energy, and expertise into a groundbreaking decentralized Web3 ecosystem to revolutionize the space with real utility, revenue streams and intrinsic value to our communities. Moving beyond simple PFPs, merchandise, and token gated parties, we are ushering in a new era of rapid adoption, focusing on Digital Collectibles, content creation, digital identity and gaming. Powered by our own state of the art zero-knowledge rollup, MalayaZK, Operation Resurgence aims to become the catalyst that onboards the masses into our Web3 world.

Entering **Andrometa**

Introducing Andrometa, an ecosystem that revolutionizes the Web3 World with an expanding array of innovative features and utilities. Within our Web3 ecosystem discover our Gas-Free **Andrometa Digital Asset Marketplace** for seamless trading, collecting, and creation of unique interoperable digital assets, from avatars to accessories, without draining your wallet. Breathe life into your digital collectibles and embrace your digital identities with our turn-key VTuber Streaming Platform, **AniMee**, allowing you to animate your Digital Collectibles using just your webcam or phone camera. Stream, create content, and embrace your digital identities like never before. Finally, jump into the Arena with Meta Smash Fighters, our blockchain enabled mobile fighting game, where your digital collectibles become your avatars that you can fully customize using assets within the marketplace.

For the past 2 years our team led by our Genius CTO has poured in countless hours building the blockchain infrastructure that powers these Web3 experiences. Introducing **MalayaZK** from the Filipino word meaning "Free"; a zero-knowledge layer 2 rollup off Ethereum. MalayaZK offers a quantum resistance, lightning fast, and a secure, decentralized backend that incorporates user-friendly REST APIs to enable rapid onboarding for developers, users, brands, and creators.

MalayaZK is the infrastructure layer that blazes a path for a vast decentralized gaming and entertainment ecosystem, where avatars and assets are interoperable across all titles, unlocking new ways to engage, play, socialize, and monetize your Digital Assets.

We Are the Outkast X The Sevens

In the Summer of 2022, two major **OG Anime** NFT communities, **We Are the Outkast** and **The Sevens** joined forces, determined to reshape the Web3 space forever. Despite facing a ruthless bear market, these tight-knit communities have forged unbreakable bonds, patiently waiting as we crafted our vision behind the scenes. Now the year of Deployment is underway and we're beyond thrilled to announce the upcoming launch of our two manga series for both communities next month!

Draft Scene From We Are the Outkast Manga

Draft Scene From The Sevens Manga

"We are tearing down barriers and inviting creators of all levels to build, develop, and launch their own games, DApps, and everything in between. This is the future of Web3 mass adoption, and it's right at your fingertips on MalayaZK."

- Michael Christine, Esq.
Founder and CEO of MNNT.

In pursuit of mass adoption, we've partnered with **VoyceMe**, a popular and rapidly growing online manga distribution platform boasting 3 million daily active users and 250,000 unique visitors per day. This collaboration will catapult our communities, collections, and stories into the limelight, exposing millions of new users to the captivating worlds of **The Sevens** and **We Are the Outkast!**

When newbies discover the remarkable communities of **The Sevens** and **Outkast**, they'll be enticed to own story characters, stream as beloved heroes, and dive into our interoperable games as their favorite characters. This immersive engagement fosters an unrivaled connection, enabling fans to use and explore their digital identities. As our Mangas gain popularity (with our communities' support), we'll pitch them to studios for Anime Production!

AniMee

"Bring Your Digital Collectibles to Life and Embrace your Digital Identity! "

Brace yourselves for the ultimate revolution in content creation! AniMee, our subscription based turn-key VTuber platform, is **launching this summer** empowering you to truly bring your digital collectibles to life!

Have you ever wanted to create and stream content without Doxxing Yourself?

Well AniMee makes it easier than ever to embrace your digital identities, stream and make content across multiple platforms at once! Just connect your vault (wallet), select a Digital Collectible avatar, turn on your phone camera or webcam, and instantly start streaming to your favorite platforms simultaneously as your Digital Collectible!

AniMee introduces amazing monetization opportunities for Digital Collectible holders and content creators alike outlined in the table below.

Monetization Model	Participants	Description
Subscription Model	Subscribers	Users subscribe to the platform to access exclusive features, NFTs, and content.
Revenue-Sharing System	Digital Collectible Owners	Owners receive a certain amount of 'Variant Derivatives' based on their subscription level. These derivatives enable non-owners to stream and create content using a variant of the original digital collectible.
	Non-Owners (Variant Users)	Non-owners can use the 'Variant Derivatives' to stream and create content with a variant of the original digital collectible.
Advertising Revenue Share	Original NFT Holders	Based upon the number of hours streamed per month, Original NFT holders can enter into a pool where a % of the advertising revenue earned by the platform is shared across the original Digital Collectible holders who reached the minimum streaming requirement for that month.
		Non NFT Holders can also enter a pool based on the number of hours they steam. This pool will encompass a smaller % of total advertising revenue earned by the platform spread across the variant users who become eligible.
Example	Tatted (Outkast NFT Collection)	The owner of Tatted receives 5% of the revenue generated from all Tatted Variant streams and content creation, capped at \$50,000 a year per variant. Non-owners can use Tatted Variants to create content and build communities around the Tatted character on the platform.

AniMee's variant system offers streamers and content creators a unique way to build strong communities and share in the success of their favorite personalities. Owners benefit from increased revenue and wider brand exposure, while those who may not be able to afford an original Digital Collectible, can still become VTubers and create content alongside their favorite streamers.

Meta Smash Fighters

Introducing Meta Smash Fighters, a mobile fighting game featuring your Digital Collectibles as playable characters. Customize your gameplay with weapons, armor, clothing, and accessories, all unique digital assets. Our innovative approach connects animations to weapons and accessories instead of specific characters, allowing for complete customization of your playstyle.

Meta Smash Fighters offers different gameplay tiers. In Demo Mode, players can test their skills against an NPC bot with no commitment. Casual Mode lets players that own Digital Collectible from our collections engage in PVP battles, earning experience points and GLORY. Finally, Ranked Mode requires users to own a Digital Collectible from our collections and Andrometa's currency, Andrometa \$SHRDS. Players contribute a specific amount of \$SHRDS to enter a match, which is matched by an opponent. The winner of the best-of-three showdown claims the prize, emphasizing true competition and skill as a foundation for rewards!

Meta Smash is Set to Release its Beta in October of this year!

Operation Resurgence represents the culmination of years of passion, dedication, and innovation, uniting two incredible NFT communities and introducing groundbreaking products and services. As we take the world of digital collectibles to new heights, our mission is to foster mass adoption and reshape the digital landscape. With Andrometa, AniMee, and Meta Smash Fighters, we are bridging the gap between virtual and real, empowering content creators, and pushing the boundaries of gaming and entertainment. Together, we're boldly venturing into an exciting new era of Web3, revolutionizing the way we engage with digital assets. Join us on this thrilling journey and become part of the next generation of digital collectible experiences!
